Contents of volume 335

No. 1 issued on January 9, 1987

F. Dreyer, F. Rosenberg, C. Becker, H. Bigalke, R. Penner: Differential effects of various secretagogues on quantal transmitter release from mouse motor nerve terminals treated with botulinum A and tetanus toxin 1

E. Grana, A. Lucchelli, F. Zonta, C. Boselli: Determination of dissociation constants and relative efficacies of some potent muscarinic agonists at postjunctional muscarinic receptors 8

H. H. Keller, R. Kettler, G. Keller, M. Da Prada: Short-acting novel MAO inhibitors: In vitro evidence for the reversibility of MAO inhibition by moclobemide and Ro 16-6491 12

K. Racké, E. Böhm, E. Muscholl: The role of cytoplasmic (newly synthesized) dopamine for the spontaneous and electrically evoked release of dopamine and its metabolites from the isolated neurointermediate lobe of the rat pituitary gland in vitro 21

G. Cichini, P. Placheta, E. A. Singer: B-HT 920 and B-HT 958: Presynaptic effects on electrically evoked ^{3}H-dopamine release from slices of rat nucleus accumbens 28

D. A. S. Parker, I. S. de la Lande, C. Proctor, V. Marino, N. X. Lam, I. Parker: Cocaine-sensitive O-methylation of noradrenaline in dental pulp of the rabbit: Comparison with the rabbit ear artery 32

N.-E. Andén, M. Grabowska-Andén, T. Nilsson: Are the α_2-adrenoceptors in the noradrenaline cell body region of physiological significance? 40

H. Itoh, J. D. Kohli, S. I. Rajfer: Pharmacological characterization of the postsynaptic alpha-adrenoceptors in isolated canine mesenteric arteries and veins 44

L. Hyland, P. Warnock, J. R. Docherty: Age-related alterations in α_1- and β-adrenoceptors mediated responsiveness of rat aorta 50

P. Slater, D. A. Starkie: Changes in limb tone produced by regional injections of opiates into rat brain 54

R. F. Bruns, J. H. Fergus, E. W. Badger, J. A. Bristol, L. A. Santay, J. D. Hartman, S. J. Hays, C. C. Huang: Binding of the A_1-selective adenosine antagonist 8-cyclopentyl-1,3-dipropylxanthine to rat brain membranes 59

R. F. Bruns, J. H. Fergus, E. W. Badger, J. A. Bristol, L. A. Santay, S. J. Hays: PD 115,199: An antagonist ligand for adenosine A_2 receptors 64

R. Susilo, H. Rommelspacher: Formation of a β-carboline (1,2,3,4-tetrahydro-1-methyl-β-carboline-1-carboxylic acid) following intracerebroventricular injection of tryptamine and pyruvic acid 70

M. Korth, J. Engels: Inotropic and electrophysiological effects of 8-substituted cyclic AMP analogues on guinea-pig papillary muscle 77

J. Koley, J. K. Saha, B. Koley: The role of calcium channel in the effect of nicotine on contractility in isolated toad ventricle 86

U. Karbach, W. Rummel: Strontium transport in the rat colon 91

R. Schulz, D. Winne: Relationship between antipyrine absorption and blood flow rate in rat jejunum, ileum, and colon 97

No. 2 issued on February 6, 1987

T. P. Kenakin, D. Beek: The effects on Schild regressions of antagonist removal from the receptor compartment by a saturable process 103

D. H. Manier, D. D. Gillespie, E. Sanders-Bush, F. Sulser: The serotonin/noradrenaline-link in brain. I. The role of noradrenaline and serotonin in the regulation of density and function of beta adrenoceptors and its alteration by desipramine 109

S. Urwyler, D. Coward: Binding of ^{3}H-spiperone and ^{3}H-(−)-sulpiride to dopamine D2 receptors in rat striatal membranes: methodological considerations and demonstration of the identical nature of the binding sites for the two ligands 115

T. Magaribuchi, T. Hama, K. Kurahashi, M. Fujiwara: Effects of extraneuronal uptake inhibitors on the positive chronotropic response to isoprenaline and on the accumulation of isoprenaline in perfused rat heart after inhibition of catechol-O-methyl transferase 123

M. Henseling: Differences between the neuronal handling of ^{3}H-7- and ^{3}H-7,8-(−)noradrenaline: implications for the release of the labelled neurotransmitter by nerve stimulation 129

C. Nordstedt, B. B. Fredholm: Phorbol-12,13-dibutyrate enhances the cyclic AMP accumulation in rat hippocampal slices induced by adenosine analogues 136

E. C. Monteiro, J. A. Ribeiro: Ventilatory effects of adenosine mediated by carotid body chemoreceptors in the rat 143

Z. Lelkes, F. Obál Jr., G. Benedek, G. Rubicsek, P. Alföldi, F. Obál: Effects of acute and chronic treatment with an atypical antidepressant drug, nomifensine, on the sleep-wake activity in rats 149

K.-H. Carlsson, I. Jurna: The role of descending inhibition in the antinociceptive effects of the pyrazolone derivatives, metamizol (dipyrone) and aminophenazone ("Pyramidon") 154

O. Binah, I. Rubinstein, A. Bomzon, O. S. Better: Effects of bile acids on ventricular muscle contraction and electrophysiological properties: studies in rat papillary muscle and isolated ventricular myocytes **160**

M. Korth, J. Engels, M. Schäfer-Korting: Influence of phosphodiesterase inhibition and of carbachol on inotropic effects of 8-substituted cyclic AMP analogues **166**

J. Velly, M. Grima, G. Marciniak, M. O. Spach, J. Schwartz: Effects of some antianginal and vasodilating drugs on sodium influx and on the binding of ^{3}H-batrachotoxinin-A20-α-benzoate and ^{3}H-tetracaine **176**

M. Kohlhardt, U. Fröbe, J. W. Herzig: Removal of inactivation and blockade of cardiac Na^+ channels by DPI 201–106: different voltage-dependencies of the drug actions **183**

N. Ogawa, H. Ono: Role of Ca channel in the renal autoregulatory vascular response analysed by the use of BAY K8644 **189**

M. Mark, E. Fitzel, N. Youssif, A. B. Müller, M. I. Anazodo, H. P. T. Ammon: Effects of propylthiouracil and methylthiouracil on cyclic AMP and ion movements in rat pancreatic islets **194**

A. Anadón, M. R. Martinez-Larrañaga: An inhibitory action of tetracyclines on guinea-pig myenteric plexus **200**

D. Winne, H. Görig, U. Müller: Closed rat jejunal segment in situ: role of pre-epithelial diffusion resistance (unstirred layer) in the absorption process and model analysis **204**

Short communication

Y. Kurachi, T. Nakajima, T. Sugimoto: Quinidine inhibition of the muscarine receptor-activated K^+ channel current in atrial cells of guinea pig **216**

No. 3 issued on March 11, 1987

G. Bonanno, M. Raiteri: Interaction between 5-HT uptake inhibition and activation of 5-HT autoreceptors by exogenous agonists in rat cerebral cortex slices and synaptosomes **219**

D. Hoyer, P. Vos, A. Closse, A. Pazos, J. M. Palacios, H. Davies: [^{3}H]Ketanserin labels 5-HT_2 receptors and α_1-adrenoceptors in human and pig brain membranes **226**

I. Wessler, J. Sandmann: Uptake and metabolism of [^{3}H]choline by the rat phrenic nerve-hemidiaphragm preparation **231**

H. Herdon, S. R. Nahorski: Comparison between radiolabelled and endogenous dopamine release from rat striatal slices: effects of electrical field stimulation and regulation by D_2-autoreceptors **238**

D. U. Panek, A. J. Azzaro, R. E. Stitzel, R. J. Head: Inhibition of tyrosine hydroxylase in rabbit mesenteric artery and vas deferens by catechol oestrogens **243**

A.-L. Ungell, K.-H. Graefe: Failure of K^+ to affect the potency of inhibitors of the neuronal noradrenaline carrier in the rat vas deferens **250**

J.-T. Cheng, C. L. Shen: Release of neuropeptide Y (NPY) induced by tyramine in the isolated vas deferens of rat **255**

K. F. Rhodes, J. F. Waterfall: The effects of some α-adrenoceptor antagonists on the responses of the canine saphenous vein to B-HT 933, UK-14304 and methoxamine **261**

A. J. Turner, J. P. Seale, J. L. Black, M. R. Compton, J. Shaw: Studies on alpha adrenoceptors in guinea-pig peripheral lung strips **269**

T. Kubo, M. Kihara, H. Hata, Y. Misu: Cardiovascular effects in rats of alpha$_1$ and alpha$_2$ adrenergic agents injected into the nucleus tractus solitarii **274**

A. N. M. Schoffelmeer, F. Hogenboom, A. H. Mulder: Inhibition of dopamine-sensitive adenylate cyclase by opioids: possible involvement of physically associated μ- and δ-opioid receptors **278**

Y. Itoh, R. Oishi, M. Nishibori, K. Saeki: Involvement of opioid receptors in phencyclidine-induced enhancement of brain histamine turnover in mice **285**

R. Hosoki, T. Hisayama, I. Takayanagi: Pharmacological evidence for the possible coexistence of multiple receptor sites for mammalian tachykinins in rabbit iris sphincter smooth muscle **290**

S. J. Bailey, I. T. Lippe, P. Holzer: Effect of the tachykinin antagonist, [D-Pro^4, D-Trp^{7,9,10}] substance P-(4-11), on tachykinin- and histamine-induced inositol phosphate generation in intestinal smooth muscle **296**

D. M. Paton, P. A. Lockwood, D. L. Martlew, R. A. Olsson: Potency of N^6-modified N-alkyl adenosine-5'-uronamides at presynaptic adenosine receptors in guinea-pig ileum **301**

H. Abul, J. Davidson, A. S. Milton, D. Rotondo: Dexamethasone pre-treatment is antipyretic toward polyinosinic: polycytidylic acid, lipopolysaccharide and interleukin 1/endogenous pyrogen **305**

J. Hasegawa, H. Satoh, M. Vassalle: Induction of the oscillatory current by low concentrations of caffeine in sheep cardiac Purkinje fibres **310**

J. Mészáros, R. Markó, K. Kelemen, V. Kecskeméti: Blockage of the fast sodium current by dimetindene in frog auricular fibres **321**

S. Herzig, H. Lüllmann, K. Mohr, B. Seemann: Acrihellin, a cardioactive steroid escaping from the organ-bath **326**

C. Lillie, W. Kobinger: Investigations differentiating the mechanism of specific bradycardic agents from that of calcium channel blockers **331**

J. Lang, Q. T. Chah, J.-P. Lançon, P. Charve, J.-F. Aupetit, J. Loufoua-Moundanga, G. Faucon: Potentiation by acetylcholine of the effects of a calcium channel activator, Bay k8644, on dog atria in situ **334**

C. Schächtele, B. Wagner, D. Marmé: Stereoselective inhibition of calmodulin-dependent cAMP phosphodiesterase from bovine heart by (+)- and (−)-nimodipine **340**

A. J. Nichols, C. R. Hiley: Comparison of the effects of intravenous and intrasplenic infusions of glucagon on cardiac output and its distribution in the rat **344**

J. Casals-Stenzel: Triazolodiazepines are potent antagonists of platelet activating factor (PAF) in vitro and in vivo **351**

H. Ozaki, K. Kohama, Y. Nonomura, S. Shibata, H. Karaki: Direct activation by okadaic acid of the contractile elements in the smooth muscle of guinea-pig taenia coli **356**

No. 4 issued on April 9, 1987

M. Frenken, A. J. Kaumann: Allosteric properties of the 5-HT_2 receptor system of the rat tail artery. Ritanserin and methysergide are not competitive 5-HT_2 receptor antagonists but allosteric modulators **359**

A. D. Fryer, J. Maclagan: Pancuronium and gallamine are antagonists for pre- and post-junctional muscarinic receptors in the guinea-pig lung **367**

A. Closse, H. Bittiger, D. Langenegger, A. Wanner: Binding studies with [^{3}H]cis-methyldioxolane in different tissues. Under certain conditions [^{3}H]cis-methyldioxolane labels preferentially but not exclusively agonist high affinity states of muscarinic M_2 receptors **372**

M. Schmidt, E. Giesen-Crouse, J.-L. Imbs: Renal and iliac vascular effects of dopamine in the anaesthetized rat **378**

L. Brown, M. Näbauer, E. Erdmann: Dobutamine: positive inotropy by nonselective adrenoceptor agonism in isolated guinea pig and human myocardium **385**

J. N. Sengupta, A. Hamada, D. D. Miller, P. N. Patil: Interaction of enantiomers of hydroxy tolazoline with adrenoceptors **391**

S. Guimarães, M. Q. Paiva, D. Moura: Alpha$_2$-adrenoceptor-mediated responses to so-called selective alpha$_1$-adrenoceptor agonists after partial blockade of alpha$_1$-adrenoceptors **397**

A. J. Kaumann, H. Lemoine: β_2-Adrenoceptor-mediated positive inotropic effect of adrenaline in human ventricular myocardium. Quantitative discrepancies with binding and adenylate cyclase stimulation **403**

R. A. Keith, A. I. Salama: Inhibition of presynaptic alpha-2-adrenoceptor and opioid receptor agonist responses in the rat vas deferens by chronic imipramine treatment **412**

P. Illes, R. Bettermann, I. Brod, B. Bucher: β-Endorphin-sensitive opioid receptors in the rat tail artery **420**

B. Bucher, R. Bettermann, P. Illes: Plasma concentration and vascular effect of β-endorphin in spontaneously hypertensive and Wistar Kyoto rats **428**

E. T. Whalley, Y. O. Amure, R. H. Lye: Analysis of the mechanism of action of bradykinin on human basilar artery in vitro **433**

M. Freissmuth, V. Hausleithner, E. Tuisl, C. Nanoff, W. Schütz: Glomeruli and microvessels of the rabbit kidney contain both A_1- and A_2-adenosine receptors **438**

J. J. Jukna, C. D. Nicholson: The effect of denbufylline on the viscosity of rat whole blood and on the deformability (filterability) of rat blood cell suspensions **445**

W. Kolasiewicz, J. Baran, S. Wolfarth: Mechanographic analysis of muscle rigidity after morphine and haloperidol: a new methodological approach **449**

B. A. McMillen, S. M. Scott, H. L. Williams, M. K. Sanghera: Effects of gepirone, an aryl-piperazine anxiolytic drug, on aggressive behavior and brain monoaminergic neurotransmission **454**

G. Nyberg, E. Mårtensson: Unbound plasma concentrations, total plasma concentrations, and red blood cell concentrations of thioridazine and its main metabolites: an in vitro study **465**

I. Bauer, P. Neubert, W. Schaumann: Pharmacodynamics, pharmacokinetics and metabolism of digitoxin and derivatives in cats **469**

Short communication

M. Böhm, W. Schmitz, H. Scholz: Evidence against a role of a pertussis toxin-sensitive guanine nucleotide-binding protein in the alpha$_1$-adrenoceptor-mediated positive inotropic effect in the heart **476**

Erratum

R. P. McAdams, J. F. Waterfall: The effect of age on the sensitivity of pre- and postsynaptic alpha-adrenoceptors to agonists and antagonists in the rat **480**

No. 5 issued on May 27, 1987

M. Frenken, A. J. Kaumann: Interconversion into a low active state protects vascular 5-HT$_2$-receptors against irreversible antagonism by phenoxybenzamine **481**

M. T. Lin, J. M. Lee, J. T. Cheng: Changes in central serotoninergic transmission affect clonidine analgesia in monkeys **491**

I. Wessler, J. Rasbach, B. Scheuer, U. Hillen, H. Kilbinger: Effects of (+)-tubocurarine on [^{3}H]acetylcholine release from the rat phrenic nerve at different stimulation frequencies and train lengths **496**

S. Benkirane, S. Arbilla, S. Z. Langer: A functional response to D$_1$ dopamine receptor stimulation in the central nervous system: inhibition of the release of [^{3}H]-serotonin from the rat substantia nigra **502**

E. Kelly, S. R. Nahorski: Dopamine D-2 receptors inhibit D-1 stimulated cyclic AMP accumulation in striatum but not limbic forebrain **508**

S. Barone, D. Panek, L. Bennett, R. E. Stitzel, R. J. Head: The influence of oestrogen and oestrogen metabolites on the sensitivity of the isolated rabbit aorta to catecholamines **513**

K. Andersson, K. Fuxe, P. Eneroth, L. F. Agnati, A. Härfstrand: Effects of acute continuous exposure of the rat to cigarette smoke on amine levels and utilization in discrete hypothalamic catecholamine nerve terminal systems and on neuroendocrine function **521**

E. Glusa, F. Markwardt: Effects of calcium channel blockers on the contractile response to dihydroergotamine in isolated human femoral veins **529**

C. A. Hamilton, N. M. Deighton, J. L. Reid: Rapid and reversible desensitisation of vascular and platelet alpha$_2$ adrenoceptors **534**

U. Conzelmann, D. K. Meyer: Blockade of γ-aminobutyric acid-receptors of the B-subtype inhibits the dopamine-induced enhancement of the release of cholecystokinin-like immunoreactivity from slices of rat dorsal caudatoputamen **541**

F. Zambotti, N. Zonta, B. Hafner, P. Ferrario, L. Zecca, P. Mantegazza: Modification of GABA turnover in the striatum and hippocampus of the rat after zopiclone **547**

E. T. Whalley: Metabolism of bradykinin and angiotensin I by human basilar artery and rabbit aorta **551**

M. J. Lohse, K. Maurer, H.-P. Gensheimer, U. Schwabe: Dual actions of adenosine on rat peritoneal mast cells **555**

K. Ikezono, M. C. Michel, H.-R. Zerkowski, J. J. Beckeringh, O.-E. Brodde: The role of cyclic AMP in the positive inotropic effect mediated by β_1- and β_2-adrenoceptors in isolated human right atrium **561**

Y. Habuchi, M. Nishimura, Y. Watanabe: Electrophysiologic effects of nicorandil, a new antianginal agent, on action potentials and membrane currents of rabbit atrioventricular node **567**

H. Nagase, H. Karaki, N. Urakawa: Palytoxin-induced endothelium-dependent relaxation in the isolated rat aorta **575**

P. Santicioli, R. Gamse, C. A. Maggi, A. Meli: Cystometric changes in the early phase of streptozotocin-induced diabetes in rats: evidence for sensory changes not correlated to diabetic neuropathy **580**

Short communications

J. Bockaert, A. Dumuis, R. Bouhelal, M. Sebben, R. N. Cory: Piperazine derivatives including the putative anxiolytic drugs, buspirone and ipsapirone, are agonists at 5-HT$_{1A}$ receptors negatively coupled with adenylate cyclase in hippocampal neurons **588**

A. F. Roffel, W. G. in't Hout, R. A. de Zeeuw, J. Zaagsma: The M$_2$ selective antagonist AF-DX 116 shows high affinity for muscarine receptors in bovine tracheal membranes **593**

No. 6 issued on June 11, 1987

I. Wessler, V. Eschenbruch, S. Halim, H. Kilbinger: Presynaptic effects of scopolamine, oxotremorine, noradrenaline and morphine on [^{3}H]acetylcholine release from the myenteric plexus at different stimulation frequencies and calcium concentrations **597**

I. Wessler, M. Karl, M. Mai, A. Diener: Muscarine receptors on the rat phrenic nerve, evidence for positive and negative muscarinic feedback mechanisms **605**

G. Cichini, E. A. Singer: B-HT 920, B-HT 933, and B-HT 958: presynaptic effects on electrically evoked ^{3}H-noradrenaline release from slices of rat brain cortex and hypothalamus **613**

E. Kelly, A. L. Willcocks, S. R. Nahorski: Neurochemical and behavioural evidence that dopamine D-2 receptors in striatum couple to the N_i regulatory protein and inhibition of cyclic AMP accumulation **618**

J. Atkinson, M. Sonnay, M. Sautel, A.-K. Fouda: Chronic treatment of the spontaneously hypertensive rat with captopril attenuates responses to noradrenaline in vivo but not in vitro **624**

M. Tonini, L. Onori, C. A. Rizzi, E. Perucca, L. Manzo, A. Crema: Involvement of substance P in the excitatory action of $GABA_A$ agonists on cholinergic neurons in the guinea-pig ileum **629**

C. A. Maggi, P. Santicioli, L. Abelli, M. Parlani, M. Capasso, B. Conte, S. Giuliani, A. Meli: Regional differences in the effects of capsaicin and tachykinins on motor activity and vascular permeability of the rat lower urinary tract **636**

E. Schlicker, K. Fink, M. Göthert: Influence of eicosanoids on serotonin release in the rat brain: inhibition by prostaglandins E_1 and E_2 **646**

T. Simmet, J. Aissa, D. Sutter, H. Juan, B. A. Peskar: Modulation of the contractile activity of the guinea-pig lung parenchymal strip by exogenous 5,8,11,14,17-eicosapentaenoic acid **652**

J. Deckert, J. C. Bisserbe, P. J. Marangos: Quantitative [^{3}H] dipyridamole autoradiography: evidence for adenosine transporter heterogeneity in guinea pig brain **660**

S. Okuyama, H. Shimamura, S. Hashimoto, H. Aihara: Relation between yawning behavior and central serotonergic neuronal system in rats **667**

H.-G. Möller, K. Nowak, K. Kuschinsky: Studies on interactions between conditioned and unconditioned behavioural responses to apomorphine in rats **673**

T. Beck, J. Krieglstein: Local cerebral glucose utilization and local cerebral blood flow in conscious rats after administration of flunarizine **680**

M. Baba, M. Nishibori, R. Oishi, K. Saeki, F. Kosaka: Effects of halothane, enflurane and pentobarbital on brain histamine dynamics in mice **686**

G. Scholtysik: Evidence for inhibition by ICS 205-930 and stimulation by BRL 34915 of K^+ conductance in cardiac muscle **692**

G. B. Gaeta, M. F. Tripodi: Ketoconazole impairs biliary excretory function in the isolated perfused rat liver **697**

Short communication

P. Illes, D. Ramme, R. Busse: Photoelectric measurement of neurogenic vasoconstriction in jejunal branches of the rabbit mesenteric artery reveals the presence of presynaptic opioid δ-receptors **701**

Indexed in *Current Contents*

This volume contains a supplement with the Abstracts of the 28th Spring Meeting of the Deutsche Gesellschaft für Pharmakologie und Toxikologie, March 10–13, 1987, Mainz, R1–R112

Subject index of volume 335

acetylcholine, calcium channel activators, Bay k 8644; heart, dog, 334
acetylcholine, nicotinic autofacilitation, fading, tubocurarine; phrenic nerve-hemidiaphragma, rats, 496
acetylcholine release, myenteric plexus, muscarine autoreceptors, calcium; ileum, guinea-pig, 597
acrihellin, inotropy; atrium, guinea-pig, 326
action potential, bile acids, inotropic effect, contractile force; heart muscle, myocytes, rats, 160
action potential, nicorandil, antianginal agents, ionic currents; atrioventricular node, rabbit, 567
action potential, ICS 205-930, BRL 34915, antiarrhythmics; papillary muscle, guinea-pig, 692
adenosine, adenylate cyclase, histamine; mast cells, rats, 555
adenosine A1-receptor, adenosine antagonists, PD 116,948; brain, rats, 59
adenosine analogs, adenosine receptors; ileum, guinea-pigs, 301
adenosine analogues, respiration, chemoreceptors, adenosine A2-receptors; carotid body, rats, 143
adenosine antagonists, PD 116,948, adenosine A1-receptor; brain, rats, 59
adenosine antagonists, PD 115,199, adenosine A2-receptors; brain, rats, 64
adenosine A2-receptors, adenosine analogues, respiration, chemoreceptors; carotid body, rats, 143
adenosine A2-receptors, adenosine antagonists, PD 115,199; brain, rats, 64
adenosine receptors, adenosine analogs; ileum, guinea-pigs, 301
adenosine receptors, adenylate cyclase, proteinkinase C; hippocampal slices, rats, 136
adenosine receptors, adenylate cyclase, renin secretion; kidney, rabbit, 438
adenosine transporter, dipyridamole, heterogeneity, autoradiography; brain, guinea-pig, 660
adenylate cyclase, alpha 2-adrenoceptors, platelet aggregation; vasculature, rabbit, 534
adenylate cyclase, beta-adrenoceptors, inotropy; human myocardium, 403
adenylate cyclase, desipramine, noradrenaline, serotonin, beta-adrenoceptors; brain, rats, 109
adenylate cyclase, dopamine receptors, opioid receptors, opioids; neostriatal slices, rats, 278
adenylate cyclase, dopamine 2-receptors, pertussis toxin, N-protein; striatum, rats, 618
adenylate cyclase, dopamine receptor subtypes, cAMP; striatum, limbic forebrain, rats, 508
adenylate cyclase, histamine, adenosine; mast cells, rats, 555
adenylate cyclase, proteinkinase C, adenosine receptors; hippocampal slices, rats, 136
adenylate cyclase, renin secretion, adenosine receptors; kidney, rabbit, 438
adrenoceptors, age-related alterations; aorta, rats, 50
adrenocorticotropin, melanotropin, endorphin, opioid receptors; tail artery, hypertensive rats, 428
AF-DX 116, muscarine receptor subtypes; bovine trachea, left ventricle, 593
age-related alterations, adrenoceptors; aorta, rats, 50
allosteric regulation, §5§-hydroxytryptamine receptors; tail artery, rats, 359
alpha-adrenergic agents, blood pressure; nucleus tractus solitarii, rats, 274
alpha-adrenoceptors, benzoquinolizines; saphenous vein, dog, 261
alpha-adrenoceptors, imidazoline stereoisomeres; ileum, guinea-pig, 391
alpha-adrenoceptors, inotropy, pertussis toxin, N-proteins; auricles, rats, 476
alpha 1-adrenoceptors, ketanserin, §5§-hydroxytryptamine receptors; brain cortex, man pig, 226
alpha-adrenoceptors; lung, guinea-pig, 269
alpha-adrenoceptors; mesenteric vessels, dog, 44
alpha 2-adrenoceptors, noradrenaline neurons; cervical ganglion, rats, 40
alpha-adrenoceptors, opioid receptors, imipramine; vas deferens, rats, 412
alpha-adrenoceptors, phenoxybenzamine, calcium entry blockers; saphenous vein, dog, 397
alpha 2-adrenoceptors, platelet aggregation, adenylate cyclase; vasculature, rabbit, 534
alpha 2-autoreceptors, noradrenaline release, B-HT 933, B-HT 920, B-HT 958, azepine compounds; brain cortex, hypothalamus, rat, 613
aminophenazone, nociceptive activity, metamizol; periaqueductal grey, rats, 154
anaesthesia, histamine turnover, anaesthetics; brain, mice, 686
anaesthetics, anaesthesia, histamine turnover; brain, mice, 686
anaphylaxis, leukotriene, prostaglandin, eicosapentaenoic acid; lung, guinea-pig, 652
angiotensin converting enzyme, angiotensin, kinins, kininases; human basilar artery, aorta, rabbit, 551
angiotensin converting enzyme, endothelial derived relaxant factor, bradykinin; human basilar artery, 433
angiotensin, kinins, kininases, angiotensin converting enzyme; human basilar artery, aorta, rabbit, 551
antagonist potency, receptor classification, drug-receptor equilibra; ilium, rabbit, guinea-pig, 103
antianginal agents, ionic currents, action potential, nicorandil; atrioventricular node, rabbit, 567
antianginal drugs, sodium channel, BTX-B, tetracaine; brain, synaptosomes, rats, 176
antianxiety mechanism, aryl-piperazine drugs, §5§-hydroxytryptamine receptors, serotonergic activity, gepirone; behaviour, rats, 454
antiarrhythmic activity, dimetindene, sodium current; auricular fibres, frog, 321
antiarrhythmics, action potential, ICS 205-930, BRL 34915; papillary muscle, guinea-pig, 692
antiarrythmic agents, sodium channel, diphenylpiperazinylindoles; papillary muscles, guinea-pig, 183
anticholinergic effect, muscarine receptors, kalium channels, quinidine; atrial myocytes, guinea-pig, 216
antidepressant drugs, catecholaminergic system, sleep, nomifensine; rats, 149
antinociception, clonidine, §5§-hydroxytryptamine, serotoninergic transmission; pain, monkey, 491
antipyresis, pyrogens, dexamethasone; fever rabbit, 305
antipyrine, intestinal absorption, blood flow; intestine, rats, 97
anxiolytics, §5§-hydroxytryptamine-receptor subtypes, piperazine derivatives; hippocampus, mice, 588
apomorphine, dopamine receptors, conditioning; behavioural responses, rats, 673
apomorphine, physostigmine, serotonin; yawning, rats, 667
aryl-piperazine drugs, §5§-hydroxytryptamine receptors, serotonergic activity, gepirone, antianxiety mechanism; behaviour, rats, 454
autoradiography, adenosine transporter, dipyridamole, heterogeneity; brain, guinea-pig, 660
azepine compounds, alpha 2-autoreceptors, noradrenaline release, B-HT 933, B-HT 920, B-HT 958; brain cortex, hypothalamus, rat, 613

Bay k 8644, acetylcholine, calcium channel activators; heart, dog, 334
BAY K 8644, calcium channel, renal autoregulation, renal blood flow; perfused kidney, mongrel dog, 189
benzoquinolizines, alpha-adrenoceptors; saphenous vein, dog, 261
beta-adrenoceptors, adenylate cyclase, desipramine, noradrenaline, serotonin; brain, rats, 109
beta-adrenoceptors, contractility, cAMP, inotropy; human right atrium, 561
beta-adrenoceptors, inotropy, adenylate cyclase; human myocardium, 403
beta-adrenoceptors, uptake 2-inhibitors, isoprenaline, catechol-O-methyl-transferase; heart, rats, 123

beta-carbolines, tryptamine, pyruvic acid; brain, rats, 70
B-HT 958, azepine compounds, alpha 2-autoreceptors, noradrenaline release, B-HT 933, B-HT 920; brain cortex, hypothalamus, rat, 613
B-HT 920, B-HT 958, azepine compounds, alpha 2-autoreceptors, noradrenaline release, B-HT 933; brain cortex, hypothalamus, rat, 613
B-HT 933, B-HT 920, B-HT 958, azepine compounds, alpha 2-autoreceptors, noradrenaline release; brain cortex, hypothalamus, rat, 613
B-HT 920, B-HT 958, dopamine autoreceptors; nucleus accumbens, rats, 28
B-HT 958, dopamine autoreceptors, B-HT 920; nucleus accumbens, rats, 28
bile acid secretion, toxicity, ketoconazole, bile flow; perfused rat liver, 697
bile acids, inotropic effect, contractile force, action potential; heart muscle, myocytes, rats, 160
bile flow, bile acid secretion, toxicity, ketoconazole; perfused rat liver, 697
black widow spider venom, transmitter release, tetanus toxin, botulinum toxin, endplate; hemidiaphragma, mice, 1
blood concentrations, thioridazine; healthy volunteers, 465
blood flow, antipyrine, intestinal absorption; intestine, rats, 97
blood flow, flunarizine, glucose utilization; conscious rats, 680
blood pressure, alpha-adrenergic agents; nucleus tractus solitarii, rats, 274
blood viscosity, deformability of blood cells, denbufylline, pentoxifylline; blood, rats, 445
botulinum toxin, endplate, black widow spider venom, transmitter release, tetanus toxin; hemidiaphragma, mice, 1
bradycardic agents, calcium channel blockers, falipamil; sinoatrial node, guinea-pig, 331
bradykinin, angiotensin converting enzyme, endothelial derived relaxant factor; human basilar artery, 433
BRL 34915, antiarrhythmics, action potential, ICS 205-930; papillary muscle, guinea-pig, 692
brochoconstriction, muscarinic receptors, pancuronium, gallamine; lung, guinea-pig, 367
BTX-B, tetracaine, antianginal drugs, sodium channel; brain, synaptosomes, rats, 176

caffeine, calcium, oscillatory current; Purkinje fibers, sheep, 310
calcium, acetylcholine release, myenteric plexus, muscarine autoreceptors; ileum, guinea-pig, 597
calcium channel activators, Bay k 8644, acetylcholine; heart, dog, 334
calcium channel blockers, contraction, dihydroergotamine; human femoral veins, 529
calcium channel blockers, falipamil, bradycardic agents; sinoatrial node, guinea-pig, 331
calcium channel, contractility, nicotine; heart, toad, 86
calcium channel, renal autoregulation, renal blood flow, BAY K 8644; perfused kidney, mongrel dog, 189
calcium entry blockers, alpha-adrenoceptors, phenoxybenzamine; saphenous vein, dog, 397
calcium, neuropeptide Y, tyramine, desipramine, norepinephrine; vas deferens, rats, 255
calcium, oscillatory current, caffeine; Purkinje fibers, sheep, 310
cAMP, adenylate cyclase, dopamine receptor subtypes; striatum, limbic forebrain, rats, 508
cAMP analogues, inotropic effect, phosphodiesterase inhibition; heart, guinea-pig, 166
cAMP, inotropic effect, cardiac action potential; papillary muscle, guinea-pig, 77
cAMP, inotropy, beta-adrenoceptors, contractility; human right atrium, 561
cAMP phosphodiesterase, phosphodiesterase inhibitors, nimodipine; bovine heart, basilar artery, rabbit, 340
cAMP, thiourea derivatives, ionic fluxes, insulinotropic action, insulin release; pancreatic islets, rats, 194
capsaicin, tachykinins, neuropeptides, vascular permeability, inflammation; urinary tract, rats, 636
captopril, sympathetic neurotransmission, renin-angiotensin system; hypertensive rats, 624
cardiac action potential, cAMP, inotropic effect; papillary muscle, guinea-pig, 77
catecholaminergic system, sleep, nomifensine, antidepressant drugs; rats, 149
catecholamines, extraneuronal uptake, oestrogens; aorta rabbit, 513
catecholamines, pituitary hormones, nicotine, cigarette smoke; exposure to smoke, rats, 521
catechol oestrogens, oestrogens, tyrosine hydroxylase; smooth muscle, rabbit, rats, 243
catechol-O-methyltransferase, beta-adrenoceptors, uptake 2-inhibitors, isoprenaline; heart, rats, 123
chemoreceptors, adenosine A2-receptors, adenosine analogues, respiration; carotid body, rats, 143
cholecystokinin, dopamine, GABA-receptors; neostriatum, rats, 541
choline, end-plate; phrenic nerve-hemidiaphragma, rats, 231
cholinergic neurons, GABA agonists, substance P; ileum, guinea-pig, 629
cholinesterase, muscarinic receptors, muscarinic feedback, endplate; phrenic nerve, rats, 605
cigarette smoke, catecholamines, pituitary hormones, nicotine; exposure to smoke, rats, 521
clonidine, §5§-hydroxytryptamine, serotoninergic transmission, antinociception; pain, monkey, 491
cocaine, noradrenaline, O-methylation; incisor pulp, ear artery, rabbit, 32
conditioning, apomorphine, dopamine receptors; behavioural responses, rats, 673
contractile force, action potential, bile acids, inotropic effect; heart muscle, myocytes, rats, 160
contractility, cAMP, inotropy, beta-adrenoceptors; human right atrium, 561
contractility, nicotine, calcium channel; heart, toad, 86
contraction, dihydroergotamine, calcium channel blockers; human femoral veins, 529
contraction mechanism, tachykinins, substance P, kassinin, inositol phosphates; intestinal smooth muscle, guinea-pig, 296
cystometry, neuropeptides, streptozotocin, urinary bladder; diabetes, rats, 580

deformability of blood cells, denbufylline, pentoxifylline, blood viscosity; blood, rats, 445
denbufylline, pentoxifylline, blood viscosity, deformability of blood cells; blood, rats, 445
desipramine, noradrenaline, serotonin, beta-adrenoceptors, adenylate cyclase; brain, rats, 109
desipramine, norepinephrine, calcium, neuropeptide Y, tyramine; vas deferens, rats, 255
dexamethasone, antipyresis, pyrogens; fever rabbit, 305
digitoxin derivatives, pharmacodynamics, pharmacokinetics, metabolism; cats, 469
dihydroergotamine, calcium channel blockers, contraction; human femoral veins, 529
dimetindene, sodium current, antiarrhythmic activity; auricular fibres, frog, 321
diphenylpiperazinylindoles, antiarrythmic agents, sodium channel; papillary muscles, guinea-pig, 183
dipyridamole, heterogeneity, autoradiography, adenosine transporter; brain, guinea-pig, 660
dobutamine, inotropy; heart, guina-pig, man, 385
dopamine autoreceptors, B-HT 920, B-HT 958; nucleus accumbens, rats, 28
dopamine, GABA-receptors, cholecystokinin; neostriatum, rats, 541
dopamine metabolism; pituitary gland, rats, 21
dopamine receptors, conditioning, apomorphine; behavioural responses, rats, 673
dopamine receptors, opioid receptors, opioids, adenylate cyclase; neostriatal slices, rats, 278
dopamine 2-receptors, pertussis toxin, N-protein, adenylate cyclase; striatum, rats, 618
dopamine 2-receptors, spiperone, sulpiride; striatum, rats, 115

dopamine receptor subtypes, cAMP, adenylate cyclase; striatum, limbic forebrain, rats, 508
dopamine receptor subtypes, serotonin release; substantia nigra, rats, 502
dopamine; striatal slices, rats, 238
dopamine, vasodilation; renal and iliac vascular bed, rats, 378
drug-receptor equilibra, antagonist potency, receptor classification; ilium, rabbit, guinea-pig, 103

eicosanoids, prostaglandins, iloprost, serotonin release; brain, rats, 646
eicosapentaenoic acid, anaphylaxis, leukotriene, prostaglandin; lung, guinea-pig, 652
endorphin, opioid receptors, adrenocorticotropin, melanotropin; tail artery, hypertensive rats, 428
endorphin, opioid receptors, sympathetic neurones, neurotransmission; tail artery, rats, 420
endothelial derived relaxant factor, bradykinin, angiotensin converting enzyme; human basilar artery, 433
endothelium-derived relaxing factor, palytoxin; aorta, rats, 575
endplate, black widow spider venom, transmitter release, tetanus toxin, botulinum toxin; hemidiaphragma, mice, 1
end-plate, choline; phrenic nerve-hemidiaphragma, rats, 231
endplate, cholinesterase, muscarinic receptors, muscarinic feedback; phrenic nerve, rats, 605
enkephalins, opioid receptors, vasoconstriction; mesenteric arteries, rabbit, 701
extraneuronal uptake, oestrogens, catecholamines; aorta rabbit, 513

fading, tubocurarine, acetylcholine, nicotinic autofacilitation; phrenic nerve-hemidiaphragma, rats, 496
felipamil, bradycardic agents, calcium channel blockers; sinoatrial node, guinea-pig, 331
flunarizine, glucose utilization, blood flow; conscious rats, 680

GABA agonists, substance P, cholinergic neurons; ileum, guinea-pig, 629
GABAergic system, zopiclone, GABA turnover; striatum, hippocampus, rats, 547
GABA-receptors, cholecystokinin, dopamine; neostriatum, rats, 541
GABA turnover, GABAergic system, zopiclone; striatum, hippocampus, rats, 547
gallamine, brochoconstriction, muscarinic receptors, pancuronium; lung, guinea-pig, 367
gastrointestinal blood flow, glucagon, haemodynamics; intrasplenic administration, rats, 344
gepirone, antianxiety mechanism, aryl-piperazine drugs, §5§-hydroxytryptamine receptors, serotonergic activity; behaviour, rats, 454
glucagon, haemodynamics, gastrointestinal blood flow; intrasplenic administration, rats, 344
glucose utilization, blood flow, flunarizine; conscious rats, 680

haemodynamics, gastrointestinal blood flow, glucagon; intrasplenic administration, rats, 344
haloperidol, muscle rigidity, morphine; hind leg, rats, 449
heterogeneity, autoradiography, adenosine transporter, dipyridamole; brain, guinea-pig, 660
histamine, adenosine, adenylate cyclase; mast cells, rats, 555
histamine turnover, anaesthetics, anaesthesia; brain, mice, 686
histamine turnover, opioid receptors, phencyclidine; brain, mice, 285
5-hydroxytryptamine autoreceptors; cerebral slices, synaptosomes, rats, 219
5-hydroxytryptamine receptors, allosteric regulation; tail artery, rats, 359
5-hydroxytryptamine receptors, alpha 1-adrenoceptors, ketanserin; brain cortex, man pig, 226
5-hydroxytryptamine 2-receptors, isomerisation, phenoxybenzamine; arteries, calf, 481
5-hydroxytryptamine receptors, serotonergic activity, gepirone, antianxiety mechanism, aryl-piperazine drugs; behaviour, rats, 454
5-hydroxytryptamine-receptor subtypes, piperazine derivatives, anxiolytics; hippocampus, mice, 588
5-hydroxytryptamine, serotoninergic transmission, antinociception, clonidine; pain, monkey, 491

ICS 205-930, BRL 34915, antiarrhythmics, action potential; papillary muscle, guinea-pig, 692
iloprost, serotonin release, eicosanoids, prostaglandins; brain, rats, 646
imidazoline stereoisomeres, alpha-adrenoceptors; ileum, guinea-pig, 391
imipramine, alpha-adrenoceptors, opioid receptors; vas deferens, rats, 412
inflammation, capsaicin, tachykinins, neuropeptides, vascular permeability; urinary tract, rats, 636
inositol phosphates, contraction mechanism, tachykinins, substance P, kassinin; intestinal smooth muscle, guinea-pig, 296
inotropic effect, cardiac action potential, cAMP; papillary muscle, guinea-pig, 77
inotropic effect, contractile force, action potential, bile acids; heart muscle, myocytes, rats, 160
inotropic effect, phosphodiesterase inhibition, cAMP analogues; heart, guinea-pig, 166
inotropy, acrihellin; atrium, guinea-pig, 326
inotropy, adenylate cyclase, beta-adrenoceptors; human myocardium, 403
inotropy, beta-adrenoceptors, contractility, cAMP; human right atrium, 561
inotropy, dobutamine; heart, guina-pig, man, 385
inotropy, pertussis toxin, N-proteins, alpha-adrenoceptors; auricles, rats, 476
insulinotropic action, insulin release, cAMP, thiourea derivatives, ionic fluxes; pancreatic islets, rats, 194
insulin release, cAMP, thiourea derivatives, ionic fluxes, insulinotropic action; pancreatic islets, rats, 194
intestinal absorption, blood flow, antipyrine; intestine, rats, 97
intestinal absorption, pre-epithelial diffusion resistance; jejunum, rats, 204
ionic currents, action potential, nicorandil, antianginal agents; atrioventricular node, rabbit, 567
ionic fluxes, insulinotropic action, insulin release, cAMP, thiourea derivatives; pancreatic islets, rats, 194
isomerisation, phenoxybenzamine, §5§-hydroxytryptamine 2-receptors; arteries, calf, 481
isoprenaline, catechol-O-methyltransferase, beta-adrenoceptors, uptake 2-inhibitors; heart, rats, 123
isotope effect, noradrenaline, re-use of neurotransmitter; aorta, rabbit, 129

kalium channels, quinidine, anticholinergic effect, muscarine receptors; atrial myocytes, guinea-pig, 216
kalium, noradrenaline carrier, neuronal uptake; vas deferens, rats, 250
kassinin, inositol phosphates, contraction mechanism, tachykinins, substance P; intestinal smooth muscle, guinea-pig, 296
ketanserin, §5§-hydroxytryptamine receptors, alpha 1-adrenoceptors; brain cortex, man pig, 226
ketoconazole, bile flow, bile acid secretion, toxicity; perfused rat liver, 697
kininases, angiotensin converting enzyme, angiotensin, kinins; human basilar artery, aorta, rabbit, 551
kinins, kininases, angiotensin converting enzyme, angiotensin; human basilar artery, aorta, rabbit, 551

leukotriene, prostaglandin, eicosapentaenoic acid, anaphylaxis; lung, guinea-pig, 652
limb tone, opiates; brain, rats, 54

MAO inhibitors, reversibility; brain, liver, rats, 12
melanotropin, endorphin, opioid receptors, adrenocorticotropin; tail artery, hypertensive rats, 428
metabolism, digitoxin derivatives, pharmacodynamics, pharmacokinetics; cats, 469
metamizol, aminophenazone, nociceptive activity; periaqueductal grey, rats, 154
methyldioxolane, muscarinic receptors; brain, heart, salivary glands, rats, 372
morphine, haloperidol, muscle rigidity; hind leg, rats, 449

muscarine autoreceptors, calcium, acetylcholine release, myenteric plexus; ileum, guinea-pig, 597
muscarine receptors, kalium channels, quinidine, anticholinergic effect; atrial myocytes, guinea-pig, 216
muscarine receptor subtypes, AF-DX 116; bovine trachea, left ventricle, 593
muscarinic agonists, muscarinic receptors; guinea-pig, rats, 8
muscarinic feedback, endplate, cholinesterase, muscarinic receptors; phrenic nerve, rats, 605
muscarinic receptors, methyldioxolane; brain, heart, salivary glands, rats, 372
muscarinic receptors, muscarinic agonists; guinea-pig, rats, 8
muscarinic receptors, muscarinic feedback, endplate, cholinesterase; phrenic nerve, rats, 605
muscarinic receptors, pancuronium, gallamine, brochoconstriction; lung, guinea-pig, 367
muscle rigidity, morphine, haloperidol; hind leg, rats, 449
myenteric plexus, muscarine autoreceptors, calcium, acetylcholine release; ileum, guinea-pig, 597

neurokinin, substance P, tachykinin receptors; iris sphincter, rabbit, 290
neuronal uptake, kalium, noradrenaline carrier; vas deferens, rats, 250
neuropeptides, streptozotocin, urinary bladder, cystometry; diabetes, rats, 580
neuropeptides, vascular permeability, inflammation, capsaicin, tachykinins; urinary tract, rats. 636
neuropeptide Y, tyramine, desipramine, norepinephrine, calcium; vas deferens, rats, 255
neurotransmission, endorphin, opioid receptors, sympathetic neurones; tail artery, rats, 420
nicorandil, antianginal agents, ionic currents, action potential; atrioventricular node, rabbit, 567
nicotine, calcium channel, contractility; heart, toad, 86
nicotine, cigarette smoke, catecholamines, pituitary hormones; exposure to smoke, rats, 521
nicotinic autofacilitation, fading, tubocurarine, acetylcholine; phrenic nerve-hemidiaphragma, rats, 496
nimodipine, cAMP phosphodiesterase, phosphodiesterase inhibitors; bovine heart, basilar artery, rabbit, 340
nociceptive activity, metamizol, aminophenazone; periaqueductal grey, rats, 154
nomifensine, antidepressant drugs, catecholaminergic system, sleep; rats, 149
noradrenaline carrier, neuronal uptake, kalium; vas deferens, rats, 250
noradrenaline neurons, alpha 2-adrenoceptors; cervical ganglion, rats, 40
noradrenaline, O-methylation, cocaine; incisor pulp, ear artery, rabbit, 32
noradrenaline release, B-HT 933, B-HT 920, B-HT 958, azepine compounds, alpha 2-autoreceptors; brain cortex, hypothalamus, rat, 613
noradrenaline, re-use of neurotransmitter, isotope effect; aorta, rabbit, 129
noradrenaline, serotonin, beta-adrenoceptors, adenylate cyclase, desipramine; brain, rats, 109
norepinephrine, calcium, neuropeptide Y, tyramine, desipramine; vas deferens, rats, 255
N-protein, adenylate cyclase, dopamine 2-receptors, pertussis toxin; striatum, rats, 618
N-proteins, alpha-adrenoceptors, inotropy, pertussis toxin; auricles, rats, 476

oestrogens, catecholamines, extraneuronal uptake; aorta rabbit, 513
oestrogens, tyrosine hydroxylase, catechol oestrogens; smooth muscle, rabbit, rats, 243
okadaic acid; smooth muscle, guinea-pig, 356
O-methylation, cocaine, noradrenaline; incisor pulp, ear artery, rabbit, 32
opiates, limb tone; brain, rats, 54
opioid receptors, adrenocorticotropin, melanotropin, endorphin; tail artery, hypertensive rats, 428
opioid receptors, imipramine, alpha-adrenoceptors; vas deferens, rats, 412
opioid receptors, opioids, adenylate cyclase, dopamine receptors; neostriatal slices, rats, 278
opioid receptors, phencyclidine, histamine turnover; brain, mice, 285
opioid receptors, sympathetic neurones, neurotransmission, endorphin; tail artery, rats, 420
opioid receptors, vasoconstriction, enkephalins; mesenteric arteries, rabbit, 701
opioids, adenylate cyclase, dopamine receptors, opioid receptors; neostriatal slices, rats, 278
opioids, tetracyclines; myenteric plexus, guinea-pig, 200
oscillatory current, caffeine, calcium; Purkinje fibers, sheep, 310

palytoxin, endothelium-derived relaxing factor; aorta, rats, 575
pancuronium, gallamine, brochoconstriction, muscarinic receptors; lung, guinea-pig, 367
PD 116,948, adenosine A1-receptor, adenosine antagonists; brain, rats, 59
PD 115,199, adenosine A2-receptors, adenosine antagonists; brain, rats, 64
pentoxifylline, blood viscosity, deformability of blood cells, denbufylline; blood, rats, 445
pertussis toxin, N-protein, adenylate cyclase, dopamine 2-receptors; striatum, rats, 618
pertussis toxin, N-proteins, alpha-adrenoceptors, inotropy; auricles, rats, 476
pharmacodynamics, pharmacokinetics, metabolism, digitoxin derivatives; cats, 469
pharmacokinetics, metabolism, digitoxin derivatives, pharmacodynamics; cats, 469
phencyclidine, histamine turnover, opioid receptors; brain, mice, 285
phenoxybenzamine, calcium entry blockers, alpha-adrenoceptors; saphenous vein, dog, 397
phenoxybenzamine, §5§-hydroxytryptamine

2-receptors, isomerisation; arteries, calf, 481
phosphodiesterase inhibition, cAMP analogues, inotropic effect; heart, guinea-pig, 166
phosphodiesterase inhibitors, nimodipine, cAMP phosphodiesterase; bovine heart, basilar artery, rabbit, 340
physostigmine, serotonin, apomorphine; yawning, rats, 667
piperazine derivatives. anxiolytics, §5§-hydroxytryptamine-receptor subtypes; hippocampus, mice, 588
pituitary hormones, nicotine, cigarette smoke, catecholamines; exposure to smoke, rats, 521
platelet activating factor, triazolodiazepines; platelets, man, rats, 351
platelet aggregation, adenylate cyclase, alpha 2-adrenoceptors; vasculature, rabbit, 534
pre-epithelial diffusion resistance, intestinal absorption; jejunum, rats, 204
prostaglandin, eicosapentaenoic acid, anaphylaxis, leukotriene; lung, guinea-pig, 652
prostaglandins, iloprost, serotonin release, eicosanoids; brain, rats, 646
proteinkinase C, adenosine receptors, adenylate cyclase; hippocampal slices, rats, 136
pyrogens, dexamethasone, antipyresis; fever rabbit, 305
pyruvic acid, beta-carbolines, tryptamine; brain, rats, 70

quinidine, anticholinergic effect, muscarine receptors, kalium channels; atrial myocytes, guinea-pig, 216

receptor classification, drug-receptor equilibra, antagonist potency; ilium, rabbit, guinea-pig, 103
renal autoregulation, renal blood flow, BAY K 8644, calcium channel; perfused kidney, mongrel dog, 189
renal blood flow, BAY K 8644, calcium channel, renal autoregulation; perfused kidney, mongrel dog, 189
renin-angiotensin system, captopril, sympathetic neurotransmission; hypertensive rats, 624
renin secretion, adenosine receptors, adenylate cyclase; kidney, rabbit, 438
respiration, chemoreceptors, adenosine A2-receptors, adenosine analogues; carotid body, rats, 143

re-use of neurotransmitter, isotope effect, noradrenaline; aorta, rabbit, 129
reversibility, MAO inhibitors; brain, liver, rats, 12

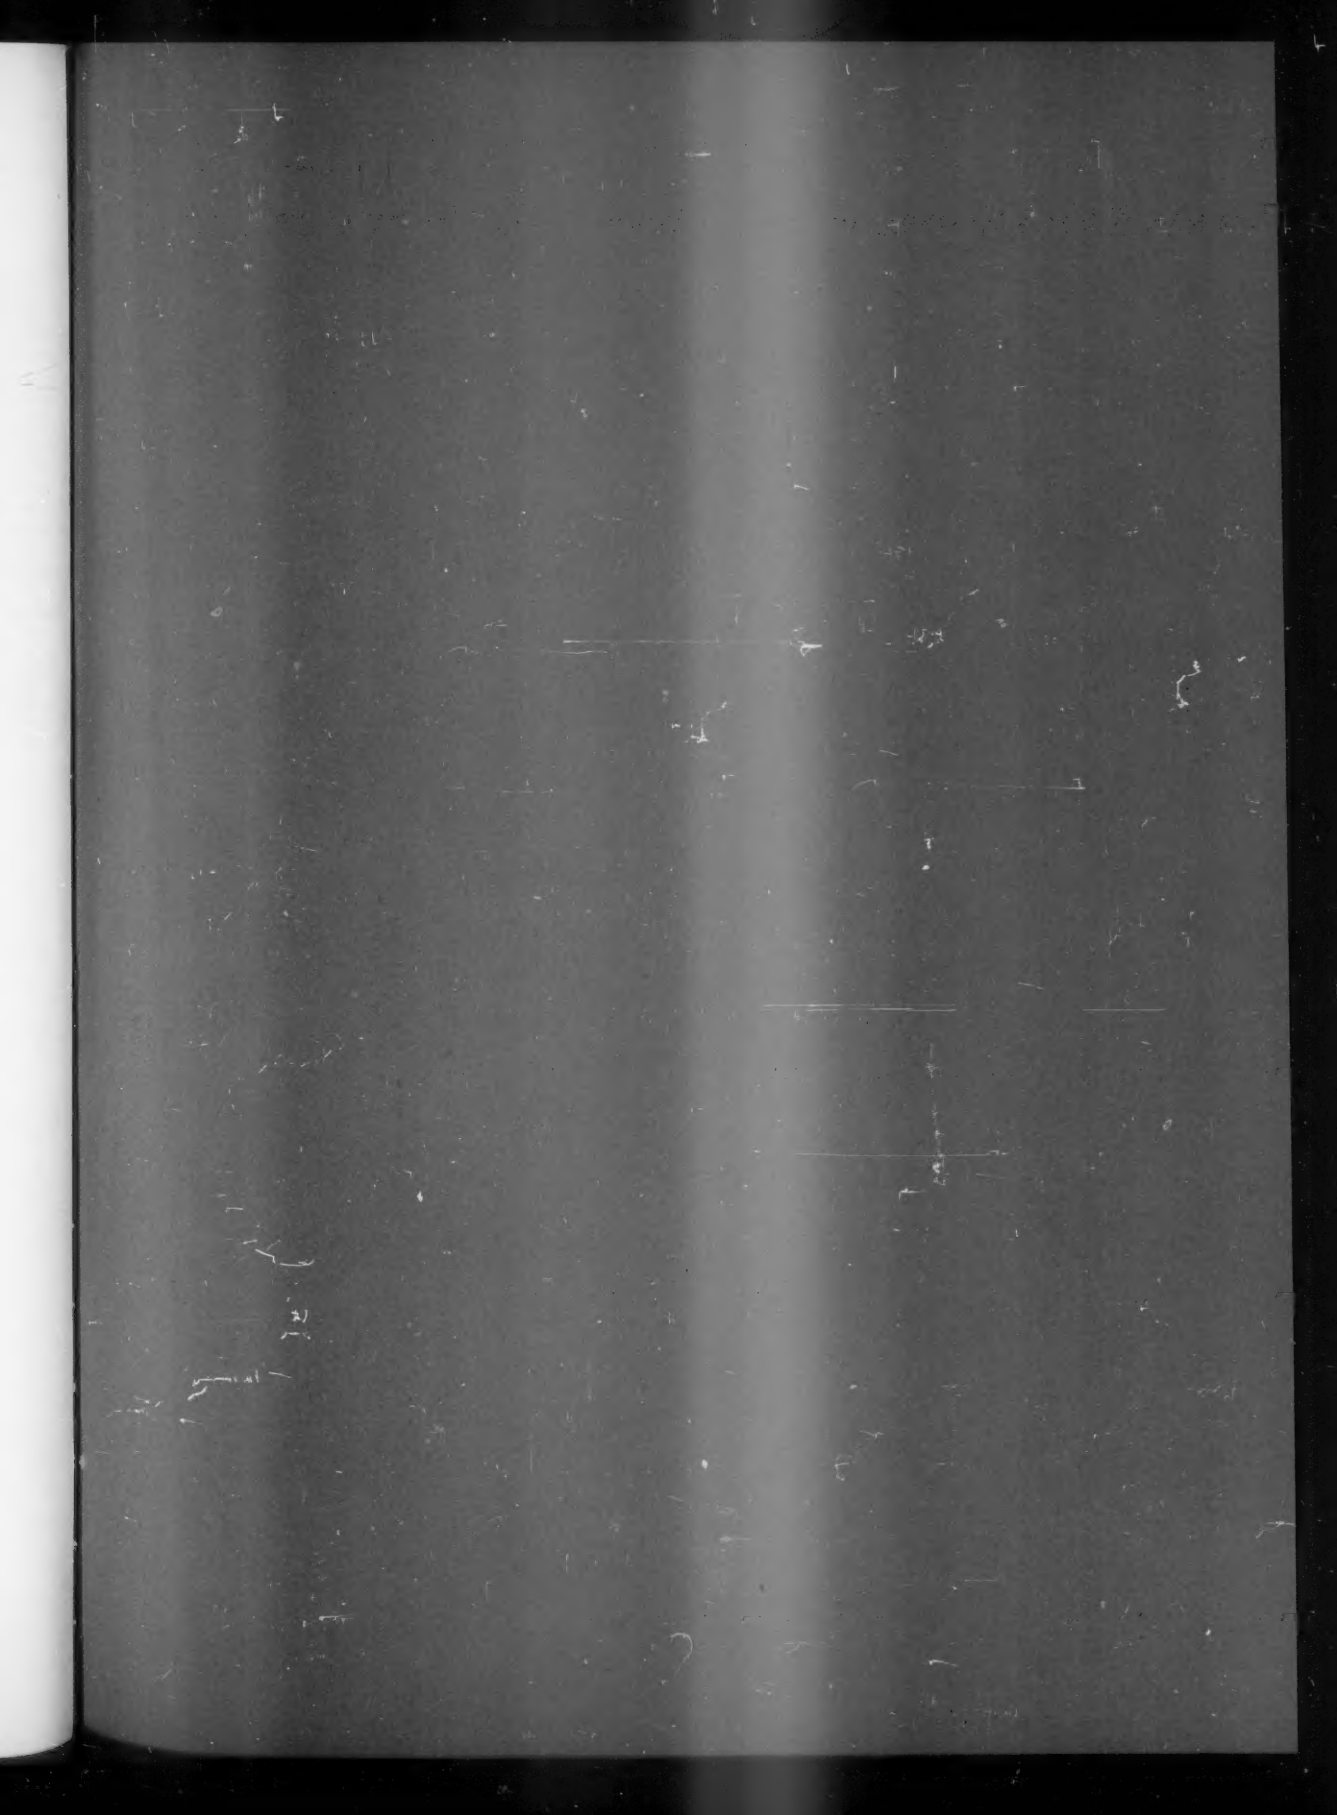
serotonergic activity, gepirone, antianxiety mechanism, aryl-piperazine drugs, 5-hydroxytryptamine receptors; behaviour, rats, 454
serotonin, apomorphine, physostigmine; yawning, rats, 667
serotonin, beta-adrenoceptors, adenylate cyclase, desipramine, noradrenaline; brain, rats, 109
serotoninergic transmission, antinociception, clonidine, §5§-hydroxytryptamine; pain, monkey, 491
serotonin release, dopamine receptor subtypes; substantia nigra, rats, 502
serotonin release, eicosanoids, prostaglandins, iloprost; brain, rats, 646
sleep, nomifensine, antidepressant drugs, catecholaminergic system; rats, 149
sodium channel, BTX-B, tetracaine, antianginal drugs; brain, synaptosomes, rats, 176
sodium channel, diphenylpiperazinylindoles, antiarrythmic agents; papillary muscles, guinea-pig, 183
sodium current, antiarrhythmic activity, dimetindene; auricular fibres, frog, 321
spiperone, sulpiride, dopamine 2-receptors; striatum, rats, 115
streptozotocin, urinary bladder, cystometry, neuropeptides; diabetes, rats, 580
strontium transport; colonic mucosa, rats, 91
substance P, cholinergic neurons, GABA agonists; ileum, guinea-pig, 629
substance P, kassinin, inositol phosphates, contraction mechanism, tachykinins; intestinal smooth muscle, guinea-pig, 296
substance P, tachykinin receptors, neurokinin; iris sphincter, rabbit, 290
sulpiride, dopamine 2-receptors, spiperone; striatum, rats, 115
sympathetic neurones, neurotransmission, endorphin, opioid receptors; tail artery, rats, 420
sympathetic neurotransmission, renin-angiotensin system, captopril; hypertensive rats, 624

tachykinin receptors, neurokinin, substance P; iris sphincter, rabbit, 290
tachykinins, neuropeptides, vascular permeability, inflammation, capsaicin; urinary tract, rats, 636
tachykinins, substance P, kassinin, inositol phosphates, contraction mechanism; intestinal smooth muscle, guinea-pig, 296
tetanus toxin, botulinum toxin, endplate, black widow spider venom, transmitter release; hemidiaphragma, mice, 1
tetracaine, antianginal drugs, sodium channel, BTX-B; brain, synaptosomes, rats, 176
tetracyclines, opioids; myenteric plexus, guinea-pig, 200
thioridazine, blood concentrations; healthy volunteers, 465
thiourea derivatives, ionic fluxes, insulinotropic action, insulin release, cAMP; pancreatic islets, rats, 194
toxicity, ketoconazole, bile flow, bile acid secretion; perfused rat liver, 697
transmitter release, tetanus toxin, botulinum toxin, endplate, black widow spider venom; hemidiaphragma, mice, 1
triazolodiazepines, platelet activating factor; platelets, man, rats, 351
tryptamine, pyruvic acid, beta-carbolines; brain, rats, 70
tubocurarine, acetylcholine, nicotinic autofacilitation, fading; phrenic nerve-hemidiaphragma, rats, 496
tyramine, desipramine, norepinephrine, calcium, neuropeptide Y; vas deferens, rats, 255
tyrosine hydroxylase, catechol oestrogens, oestrogens; smooth muscle, rabbit, rats, 243

uptake 2-inhibitors, isoprenaline, catechol-O-methyltransferase, beta-adrenoceptors; heart, rats, 123
urinary bladder, cystometry, neuropeptides, streptozotocin; diabetes, rats, 580

vascular permeability, inflammation, capsaicin, tachykinins, neuropeptides; urinary tract, rats, 636
vasoconstriction, enkephalins, opioid receptors; mesenteric arteries, rabbit, 701
vasodilation, dopamine; renal and iliac vascular bed, rats, 378

zopiclone, GABA turnover, GABAergic system; striatum, hippocampus, rats, 547



Deutsche Gesellschaft für Pharmakologie und Toxikologie

Abstracts
28th Spring Meeting

March 10–13, 1987, Mainz

Springer International

28th Spring Meeting

Deutsche Gesellschaft für Pharmakologie und Toxikologie

Mainz, March 10 - 13, 1987

		Abstract Numbers
1	Molecular Pharmacology	1 - 12
2	Absorption, Distribution, Pharmacokinetics	13 - 28
3	Drug Metabolism, Biochemical Pharmacology	29 - 61
4	Toxicology	62 - 133
5	Guanine Nucleotide Regulated Signal Transduction	134 - 143
6	Adenosine Receptors	144 - 148
7	Eicosanoids	149 - 168
8	Membrane and Transmembrane Transport	169 - 185
9	Renal Pharmacology	186 - 190
10	Calcium Entry Inhibitors and Promotors	191 - 210
11	Heart, Cardiac Glycosides	211 - 253
12	Circulation	254 - 260
13	Renin-Angiotensin, Experimental Hypertension	261 - 269
14	Gastrointestinal Tract	270 - 282
15	Endocrine Pharmacology	283 - 290
16	Immunopharmacology, Inflammation	291 - 299
17	Respiratory Tract	300 - 305
18	Cholinergic Mechanisms	306 - 317
19	Adrenergic Mechanisms	318 - 351
20	Serotoninergic Mechanisms	352 - 357
21	Opioid Mechanisms	358 - 368
22	Neuropeptides	369 - 375
23	Central Nervous System	376 - 412
24	Clinical Pharmacology	413 - 441
